CCMG Invited Lecture on

UNDERSTANDING THE BATTLE FOR THE FUTURE OF THE INTERNET: THE IMPORTANCE OF NET NEUTRALITY FOR MEDIA

Nikhil Pahwa
Founder, Editor and Publisher, Medianama.

About the Speaker

Nikhil Pahwa has been involved with online communities for over 12 years now, including groups around creative writing, design, music, bloggers and the digital media business in India. For two years, he covered the business of Indian digital media - Internet, Mobile, Media and Entertainment - for contentSutra, a part of Rafat Ali's exceptional ContentNext network of Digital Media Sites. As the Editor of contentSutra, he helped bring a pan-media perspective to digital media reportage, highlighting industry issues, identifying opportunities and problems, and questioning the efficacy of decisions being made by some large media companies. Mr. Pahwa set up MediaNama in 2008 to extend that focus to emerging segments including MVNOs, mobile payments, local language content, location based services etc, apart from bringing clarity on government policy and industry developments.

Venue: CCMG Network Governance Lab
Date: Wednesday, 23rd September, 2015
Time: 11:30 am
