She particularly appreciated the initiative undertaken by Jamia Millia University in promoting concepts like Innokart, Quadcopter, etc. Prof Anil K Gupta, Executive Vice- Chair, National Innovation Foundation (India) appreciated the efforts undertaken by Jamia Millia Islamia University.

The Centre for Innovation and Entrepreneurship (CIE) has four divisions. The mandate for each division and the activities conducted so far are as under.

INNOVATION AND TECHNOLOGY MANAGEMENT DIVISION

- Create awareness among students and faculty members regarding the need for innovation by organizing motivational lectures, innovation competitions, awareness campaigns and innovation exhibitions.
- Scouting for new and innovative ideas among students, staff and faculty across disciplines.

- Creation of Special Interest Groups (SIGs) in each Faculty / Department
- IPR policy for University being developed.

ACTIVITIES

INNOVATE FOR A CAUSE: UNIVERSITY – WIDE INNOVATION COMPETITION

Recent innovations in areas of social healthcare, agriculture, education, women empowerment, employability and much more have shown new methods of improving lives. The faculty and students are challenged to innovate and come up with ideas for improving the issues faced by society such as crime prevention, poverty alleviation, energy efficiency, urban farming, clean technologies etc. The first competition was held in 2015 and out of 20 entries eight were shortlisted for final presentation and three winners were selected in March 2015 and the winning entries were prototyped and displayed. The competition is re-launched in 2016 and the winning entries will be Prototyped.

INTERNSHIP PROGRAMME

- Started Internship programme to inspire and enable students to explore their creativity and engineering skills in a fun and competitive atmosphere that teaches them technical skills and teamwork.
- To inculcate creativity and innovations among the students, be aware of the unfulfilled needs of the society, celebrate the spirit of creativity and to participate in National & International Competitions.
- The CIE invited students of Jamia Millia Islamia to apply for Summer Internship, a total number of 160 applications were received by the CIE.
- After a rigorous interview process 26 students in all were selected by the CIE to work with them this summer as interns.
- The tenure of the paid internship program was 5-weeks in summer.

INNOVATION CLUBS: The following innovation clubs are working under CIE currently, where students are developing innovative projects and prototypes;

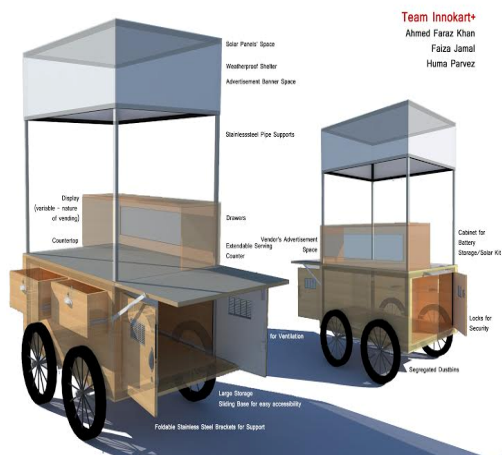

- Embedded Systems & Robotics Club
- Animation & Games Design Club
- Programming Club
- Biotech Club
- Start-Up Club

Some Projects under the innovation clubs are as follows;

INNOKART

The innovative mind behind this project identified the fact that the food sold on streets is cooked, stored and served in an unhygienic way and hence leads to health hazards. The students thus came up with a cart (thela) that has an affordable price and proper storage, shelter and hygiene. The cart promises to transform street food selling in India for the better, by providing means to the street vendors to ensure that the food is stored properly and is fit enough for human consumption- all this at a minimum price.

The team of “Innokart” consists of Huma Parvez, Ahmed Faraz Khan and Faiza Jamal who have also chalked out the financial aspects of the innovation. They aim to provide finance for such a cart firstly by procuring funds from companies as part of their CSR, and secondly in return of the advertisements that can be done on the cart. The cart is still being improvised to make it run on solar energy.

S-QUAD – SMART QUAD COPTER

It is a surveillance device equipped with image functionality. If you show 2 fingers to this device it responds with a “Hi”, however showing 3 fingers will be responded with a “Bye”. Apart from fingercount sensors, the device also has headcount sensors. This feature comes in handy when there is a need to calculate the footfall or the number of people present at any particular event.

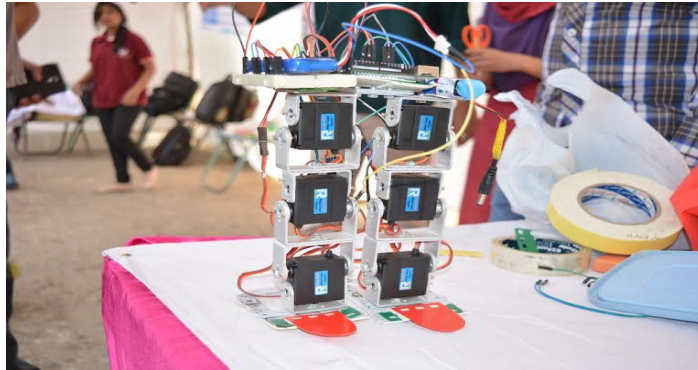

The device is controlled by an application which can be easily operated on a tablet, laptop or a computer. The innovative minds behind this device are Sonaal Dua, Gaurav Sharma, Abhinav Rai, Avinash Chaturvedi, Harsh Kaushik, Dev Bar. In its quest for excellence, the team is still working on Squad and is trying to improvise it so that it functions as an autonomous device that does not require human supervision.

HUMANOID

This project comprises of a robot that behaves like human beings. It comes with the ability of sensing images. The team consisting of Husain Quaisar, Abhishek Batra, Arsalan Javed Khan , Aman Siddiqui and Mohd. Huzaifa are behind its creation. The team is currently still working on the project to make Humanoid “more human” by adding more features. Presently, the robot can walk and kick.
