## FOREWORD

It is an immense pleasure to present the Annual Report of Jamia Millia Islamia (JMI) for the academic year 2022-2023. Seeking to present the data and statistics of accomplishments of JMI, it offers an insight into the University's comprehensive and exceptional development. The report broadly represents both academic and extra-academic activities successfully undertaken by various Faculties, Departments and Centers of JMI.

JMI is one of the foremost leading teaching and research-intensive universities and has been accredited with **A<sup>++</sup> grade** by NAAC, the most coveted Grade, in the 2<sup>nd</sup> cycle of its assessment. JMI has figured as an ideal example of a well-integrated multi-layered educational system that offers education from Nursery to Ph.D. and Post-doctoral research.

In the National Institutional Ranking Framework (NIRF) 2023 and 2022 Jamia Millia Islamia has been consistently ranked 3<sup>rd</sup> among all the universities of India. It secured 12<sup>th</sup> position in the overall ranking, amongst the 5,543 participating institutes, including premiere technical and non-technical institutions of India. Jamia's Faculty of Management Studies is placed at 25<sup>th</sup> position while Faculty of Architecture (JMI) is at 6<sup>th</sup> position. Faculty of Engineering and Technology is at 26<sup>th</sup> position, while Faculty of Law has climbed to 5<sup>th</sup> position and Faculty of Dentistry is placed at 10<sup>th</sup> position. The research significantly improved securing 10<sup>th</sup> position. Against all odds, Jamia has improved to the band of 501-600 from 601-800 in 2022 in the Times Higher Education (THE) World University Ranking-2023 among the 1799 global universities. It has again been placed among 800-1000 by QS ranking (UK) and 472 by Round University Ranking (RUR, Moscow). Jamia has secured 511 position in UI Green Metric World University Ranking.

In 2023, Jamia Millia Islamia organized Centenary Convocation, commemorating 100 glorious years of its foundation in 2020. On this occasion degrees were awarded to the students of UG, PG and Ph.D. scholars who earned their degrees in 2019 and 2020. Around twelve thousand five hundred students passed out in these two years, including around 800 gold medalists and research scholars.

During my convocation address, I took the opportunity to inform Jamia fraternity about the approval of the Ministry of Education for the establishment of Medical College & Hospital in Jamia Millia Islamia.

Several academic activities such as conferences, seminars, symposia, workshops, Ministry of Education's Global Initiative of Academic Networks (GIAN) courses, MOOCS, SWAYAM courses and so on were fruitfully held and conducted during this period. This university was awarded over dozens of projects under the SPARC scheme, Department of Higher Education, Ministry of Education. National and International collaborations imply Jamia's deep academic engagement and commitment of its faculty members with their peers as also the proactive approach of the administration that is set to enable it to be on a rare upward growth trajectory. Research projects, both at individual and at institutional levels, and the ever-increasing number of publications by the faculty members, reflect meticulous research commitment of the university. All these have come to contribute to the university's *h*-index, citations and overall ranking, improving rapidly.

I am thankful to the entire team for preparation, compilation and editing of the report in English and Hindi, and for bringing it out on time.

### Significance of the Logo

Right on the top is a star with the inscription - Allah-O-Akbar. When in dark nights poor travelers have to travel jungles and there is no one to show them the way, they chart their course with the help of stars. The star of Allah-O-Akbar is the guiding star of Jamia. Jamia focus is on this star which shows it the path in the darkling world. It reflects the truth that Allah is the greatest and we bows the head before Him only, discovers the truth. Having bowed before Him, how can the head bow before anything else? Beneath this glittering star is a book with the inscription, *Allammal Insaana Maalam Yalam* (Taught man that which he knew not). This is a verse from the Holy Quran. Through the Holy Quran, Allah has revealed His Will to His differences of caste, class, colour, of master and slave, and became true to His tenets. This book led from darkness to light, and placed the wayward and lost on the Straight Path. The Prophet made an example of his own life. By the light of his eyes and the warmth of his heart, He prepared a group of good persons who cleaned the world of evil and spread the Word of God. On both sides of the Book are two date trees signifies typical of the land where God's last Prophet was born. They are symbolic of the barren valley in which nothing grew; but it was there that the sapling of din took root. These trees are emblems of hope from a land in which not a leaf or flower could sprout; but wherein suddenly the springs of hidaya (guidance) burst forth and drenched the communities of the heart. They are a source of consolation for people who became disheartened with adverse circumstances. Why do external factors make them lose hope?

At the very bottom is a tiny crescent which reads - *Jamia Millia Islamia* in Arabic. This crescent is small but just as it expands to become the full moon on the fourteenth night, so also Jamia. Meaning that this is the beginning of our work. It will expand to become the full moon and a source of delight for the eye of its beholder.

### Panoramic Profile

### **International Women’s Day Celebrations 2023 (01.03.2023)**

#### **A Panel Discussion on Women in Science & Technology: Assuring Access, Participation & Aspiration**

Jamia Millia Islamia organises a Panel discussion on the theme – Women in Science & Technology: Assuring access, participation and aspiration.

As part of the international women’s day celebrations which are being held between March 01 – 08, 2023, the office of the Dean, Students’ Welfare, Jamia Millia Islamia today organised a panel discussion on the theme – Women in Science & Technology: Assuring access, participation and aspiration. The underlying objective was to attract attention to the abiding concern regarding inequalities and gender imbalances that continue to persist in subtle ways in the field of science & technology. The issue has been attracting considerable national and international interest particularly in the last decade. The panel consisted of three women scientists- Prof. Qamar Rahman, an internationally renowned scientist & educationist, Prof. Prerna Gaur, Director, West Campus- NSUT, and Prof. Seemi Farhat Basir, Dean, Faculty of Natural Sciences, Jamia Millia Islamia. The event was presided over by Prof. Najma Akhtar, Vice- Chancellor, Jamia Millia Islamia.

Prof. Ibraheem, Dean, Students’ Welfare delivered the welcome address in which he highlighted that despite the policy initiatives and facilitative on-field mechanisms, several stereotypes continue to persist and many barriers remain unbroken. He emphasised that the need now was to focus on eliminating the imbalances at higher levels of professions.

Prof. Qamar Rahman drew upon her own work with women in unorganised sector and her work on the physiological effects of nano particles to demonstrate how women continue to bear the brunt of hazardous work environments. She narrated personal incidents to bring to light the struggles of women who strive to achieve and make a mark in the fields of their choice. She also chose this occasion to dedicate her book *Ufaq* to aspiring young girls. Her experiences shared in an affable style touched a chord with many in the audience.

Prof. Prerna Goyal gave some quick but useful advice to girls in the form of some basic tips – invest yourself in education, support each other, be financially independent, have a voice and believe in yourself.

Prof. Seemi Farhat Basir in her presentation brought to the fore the stories of several women scientists whose achievements have either been attributed to male scientists or whose contribution has been relegated to mere footnotes to more influential papers by their male colleagues. She emphasised how diversity in its various forms enriches the field of science by bringing in creative insights and multiple perspectives to problem solving. She elaborated upon several initiatives at Jamia which work towards gender equity by providing hand holding activities as well as redressal mechanisms.

The presentations were followed by an open session in which students enthusiastically raised questions and sought clarification from the panellists. The discussion was animated and resulted in meaningful exchange of ideas.

Prof. Najma Akhtar began her presidential address by spanning the international scene and highlighting how gender equality has always been a core issue for the United Nations as demonstrated through its sustained adoption of resolutions pertaining to access and participation of women and girls in education, training, science, technology and innovation. The observance of 11<sup>th</sup> February as the International Day of women and girls in science is another step to keep the issue in global focus. She then went on to elaborate how at the national level, our government has been proactively taking steps in this direction to address the issue. Initiatives such as the GATI (or Gender Advancement for Transforming institutions), Vigyan Jyoti scheme and Indo-US fellowship for women in STEMM found a mention in her address. She followed this up by sharing that the issue of gender equality is very close to the heart

of the administration of Jamia Millia Islamia. She recounted the achievements of some of the brilliant women students of Jamia who continue to make the institution proud.

The event ended with the vote of thanks which was proposed by Prof. Gurjeet Kaur, Assistant DSW.

Most of the students were very eager to go to their school because they were thinking that they would meet and interact with their friends but when they returned to their school following challenges were faced.

**Parents Dilemma:**

- Since children had not been vaccinated against covid-19 at that time so parents were not feeling comfortable and safe in sending their kids to school.

**Adjustment to the school environment:**

- A gap of two years badly affected their habit of going to school daily.
- Academic performance of students was badly affected specially reading and writing skills of lower classes students that is Primary and Nursery students.

**Social and Emotional Support:**

- It was very important to develop the social and emotional skills of students when they returned to their school. It was essential to reconnect with the students.

**Fear and Anxiety:**

- Another challenge was to ensure parents that the school is safe for their children. It was a big challenge to maintain social distance among school students and making wearing mask compulsory.
- Overall there were many challenges such as incomplete class work lack of concentration, Slow speed of reading and writing, short attention span in students faced by the teachers while shifting from online mode of teaching to offline mode.
