Direction for the questions 31-37: Read the passage given below and answer the questions that follow.

Science affects the average man and woman in two ways. He or she benefits by its applications, driving in a motor-car or omnibus instead of a horse-drawn vehicle, being treated by disease by a doctor or a surgeon rather than a witch, and being killed with an automatic pistol or a shell in place of a dagger or a battle-axe. It also affects his or her opinions. Almost everyone believes that the earth is round, and the heavens are nearly empty instead of solid. And we are beginning to believe in our animal ancestry and the possibility of vast improvements in human life by biological methods.

But science can do something far bigger for the human mind than the substitution of one set of beliefs for another or the inculcation of scepticism regarding accepted opinions. It can gradually spread among humanity as whole the point of view that prevails among research workers, and has enabled a few thousand men and women to create science on which modern civilisation rests. If we are to control our own and one another's actions, as we are learning to control nature, the scientific point of view must come out of the laboratory and be applied to the events of daily life. It is foolish to think that the outlook which has already revolutionised industry, agriculture, medicine and warfare will prove useless when applied to the family, the nation, or the human race.

31. In the passage, the word 'ancestry' can be replaced by the word:
(a) 'origins'
32. Modern civilisation owes much to
   (a) ancestry
   (b) scientific viewpoints
   (c) laboratories
   (d) revolutionised warfare

33. The word in the passage which means 'doubt and disbelief' is
   (a) substitution
   (b) scepticism
   (c) possibility
   (d) useless

34. Scientific research has resulted in
   (a) more laboratories being set up.
   (b) biological methods.
   (c) disconnected thinking.
   (d) changing the way we think.

35. Modern civilisation is most impacted by
   (a) good research.
   (b) good researchers.
   (c) application of science.
   (d) Outlook of science.
36. The scientific point of view requires that
   (a) more research be undertaken.
   (b) motor cars replace horse-drawn vehicles.
   (c) science improve the quality of life.
   (d) men and women study science.

37. The word 'prevails' in the passage is a verb. The noun form of this would be
   (a) 'prevail'
   (b) 'prevalent'
   (c) 'prevailing'
   (d) 'prevalence'

Direction for the questions 38-45; Read the passage given below and answer the questions that follow.

In contrast to the social-realist novels of the nineteenth century, modernist writers focused on psychology, introspection and individual consciousness. While realists depicted history using a set of tools similar to those of historiographers, the modernists felt that authorial omniscience and third-person narration were 'misleadingly' objective techniques which did not allow for the position of the storyteller. They also said that the present always surely stood in the way of any clear and direct explanation of the past. In James Joyce's novel Ulysses, Stephen Dedalus declares pessimistically and introvertedly that 'History … is a nightmare from which I am trying to awake.' Writers such as Joyce turned against forms of historical understanding, seeing greater meaning in the individual rather than in society.

The ideology expressed by this stance has been hotly disputed by Marxist writers, and their debate is frequently contextualised in terms of the opposed stances of Hungarian critic Georg Lukacs and the German dramatist Bertolt Brecht. Lukacs says that modernism involves a 'negation of history' by self-consciously putting itself against the past and by rejecting modes of historical understanding. He argues that modernist writers were interested in the personal, spiritual or mystical transcendence of their surroundings, and so the social environment in their texts is little more than a backdrop. Against this viewpoint, Brecht countered that the purpose of art for Marxists was not to reflect social conditions but to attempt to change them, and this could be done only through the shock tactics of avant-garde modernist aesthetics. Real social conditions such as poverty and inequality, said Brecht, should not be shown as either fixed or acceptable but as abhorrent, outrageous and unjust.
